

## BRACARA BENCH

The bracara bench is the work of fine, almost sculptural carpentry. Traditional knowledge and artisanal techniques are used to join the wood. This bench has numerous possible uses: it can grace the façade of your house, provide a place to sit down or a surface to store things in the hall, bathroom or living room. Perfect when placed together with the Bracara dining table. This bench radiates unrivalled simplicity.

The precision-made bars merge with the coherent design in sublime harmony.
